

SG Seminar

Large Language Models in the Age of Misinformation

The rise of novel generative AI has sparked widespread excitement and significant concerns worldwide. These technologies, such as OpenAI's GPT-3 and Midjourney, have demonstrated unprecedented capabilities in generating human-like text and realistic pictures and videos. In this

talk, we overview the potential detrimental effects of generative AI when employed to create sophisticated disinformation campaigns, spread misinformation as well as deliver targeted attacks to individuals and organizations.

Prof. Francesco Pierri
Politecnico di Milano

When: Thursday
15th February 2024
16:15 pm - 17:00 pm

Where: ETH Zürich
Rämistrasse 101
LEE E 126
